

● 'Dr. X' ordered reinstated

JERSEY CITY — Superior Court Judge Frederick Kentz Jr. has ordered Christ Hospital to reinstate Dr. Mario Jasclevich, the mysterious "Dr. X" who is under investigation in the deaths of 13 hospital patients in the mid 1960s. He said, "To allow the suspension to continue would tarnish the man's professional honor." Tests on the exhumed bodies found traces of curare — a muscle-relaxing drug that can cause death — in at least two of the bodies. Eighteen vials of the drug were reportedly found in Jasclevich's locker at Riverdell in 1966.
