

Little Faith In Ford in A Poll

New York

President Ford's ability to cope with the current recession received a negative vote of 86 per cent in the latest Louis Harris poll published yesterday.

Only 11 per cent favored the President's actions.

The poll was conducted between December 13 and 17.

A 52 to 41 per cent majority in the December poll believe that rising unemployment is a more serious economic problem than rising prices.
