D.A. to Ask Senate Study Of the 'Plot'

New Orleans

The New Orleans States-Item yesterday reported that District Attorney Jim Garrison plans to seek a full-scale Senate inquiry into the Central Intelligence Agency's role in the Warren Commission's investigation of the Kennedy assassination.

The New Orleans district attorney claims the CIA and the FBI cooperated in concealing facts behind the assassination from both the Warren Commission and the American public.

Garrison has said he expects to probe that President Kennedy died as a result of a plot hatched here. The Warren Commission said it found no evidence of a conspiracy.

Garrison asserted that the intelligence agency duped the commission by flooding its members with a flow of irrelevant information in order to obscure the truth.

Garrison said Oswald was not a Communist, as he was depicted by the Warren Commission, but actually was an undercover man working closely with anti-Castro organizations in New Orleans and Dallas, using his communist background as a cover for his real activities.
