

NEW JFK THEORY

Garrison

Now Says

'Crossfire'

NEW ORLEANS (AP) — Dist. Atty. Jim Garrison said Tuesday that guerrilla fighters shooting in a crossfire from three points assassinated President John F. Kennedy.

His eight-month investigation also shows, Garrison said that the CIA is concealing the whereabouts of the assassins. The killers—anti-Castro adventurers—were helped by an unarmed fellow conspirator who caused a ruckus in Dealey Plaza, Garrison said.

"It's quite obvious that the CIA knew who they were," Garrison said, "because they had previously been CIA employees."

He said Lee Harvey Oswald, the man named by the Warren Commission as the lone assassin, was not the one who killed Kennedy.

* * * *

"THERE IS NO question at all about the fact that Lee-Harvey Oswald did not fire a shot there," said Garrison. "The President was killed by a bullet that was fired from the front. That was not the only time he was hit from the front. There was a crossfire situation set up, which involved at least two pair of gunmen behind the picket fence, which is a little bit in back of the stone wall."

"The role of the second man in each case was to pick up the actual cartridges, so that the cartridges could be disposed of as quickly as the guns, which were apparently tossed in the back of cars. There were cars parked immediately behind.

"In addition to those in front, they had at least one man in the back who was shooting, although it is becoming increasingly apparent that he was not shooting from the sixth floor of the Book Depository.

"We have located one other person who was involved. He was one of the adventurers who was involved in the anti-Castro activities, who was not using a gun but who was engaged in a row in Dealey Plaza in order to aid those who had guns.

"You had a group of men operating as a guerrilla team. It was a precision operation and was carried out with a lot of coordination."

* * * *

"IT APPEARS they used frangible bullets," Garrison continued. "They are forbidden by the Geneva Treaty, but are the kind of bullets that are quite often used for an assassination project by intelligence forces or forces employed by an intelligence agency, because there is assurance even beforehand that there will be no bullets, no slugs remaining, with any of the landmarks of the guns to help authorities identify the guns. Frangible bullets explode into little pieces."

Exactly how the assassins escaped is not known, Garrison said. The district attorney said he did not believe the CIA planned the Kennedy murder, or knew of it beforehand but he said the CIA is making every effort to prevent his office from trailing the assassins.

Although he described the assassins as "Cuban adventurers," Garrison said all were not necessarily Cuban in nationality.
