

'JFK Plot Known By Secret Service'

SPRINGFIELD (Mo.) — (UPI) Abraham Bolden, a former Secret Service agent now held at the Federal Medical Center here on undisclosed charges, has shed new light on the claim that there was a conspiracy involved in the assassination of President Kennedy.

The author Mark Lane yesterday said Bolden told him the Secret Service was aware of the assassination as a conspiracy involving President Kennedy in Chicago.

A critic of the Warren Commission's report, Lane said the commission would have found that Lee Harvey Oswald acted alone in the assassination if it had heard the story in full detail as told by Bolden.

CHARGES CANCELED

Lane said Bolden claimed that the President to Chicago had been canceled because of indications that plans had been laid to kill him there.

The author called his two days of interviews with Bolden "the most significant events since the shots were

fired in Dealey Plaza" where Kennedy was slain.

"Bolden's disclosures add important and entirely independent corroboration to Garrison's (New Orleans District Attorney Jim Garrison) conclusions," Lane said, adding that the former Federal agent would be subpoenaed as a witness before a New Orleans grand jury.

CLAIMS PROOF

Lane, the author of "Rush to Judgment," one of 46 books concerning the assassination, is an assistant to the New Orleans District Attorney, who claims he has proof a conspiracy triggered the murder of the President.

Bolden, the first Negro ever appointed to the White House detail, reportedly told Lane the Secret Service knew the identity of those who had planned an assassination in Chicago.

Although Federal officials declined to reveal the charges against Bolden, his attorney, John Hosmer, claims his client was imprisoned as a result of his information about the assassination.
