

As a guest of the Johnny Carson show, NBC-TV, Garrison presented what he said was new evidence:

Mulia Ann Mercer has given him an affidavit saying her affidavit printed in the WC volumes (Becker Exhibit 5323*) contained statements she never made and other contrary to what she did say, as well as an imitation of her signature. She tells Garrison she saw no printing on the truck, let alone any air conditioning sign, and saw the driver clearly, recognizing him on Nov. 24 as Jack Ruby when she saw him shoot Oswald on television. Says the day after the assassination the FBI showed her a picture of Jack Ruby (among others) and that she saw his name on the back of it. WR omits any mention of this. Garrison says she was threatened and left "very early," presumably after the two assassinations and the relevance of her testimony was realized.

Says FBI agent named Walter who was in the service before the assassination has said he saw a TWX message beforehand warning of an assassination plot. Says afterward there was an order for all agents to rewrite their reports to make them conform with the official story.

Says 10 men were arrested in Dallas 22nov63, and showed pictures of five of them. Said several have been established by his office as having been connected with the CIA. Said Tippit probably was killed to create the diversion necessary to obscure the release of the 10 arrested.
