

"Q" is the FBI mark for "questioned", whereas "K" is the FBI mark for "known."
Joseph D. Nicol, Sup't, Bureau of Criminal Identification
and Investigation for the State of Illinois
III, 500

"C" numbers.

"Since this case began, we have so much evidence ...
it was considered practical to reassign a C number by
us ..." Courtlandt Cunningham, FBI firearms expert,
III, 474.

Rifle

~~CE 139 XVI, 512~~

~~"Mannlicher-Carcano rifle, serial No. C2766 (this rifle will subsequently be referred to as "the C2766" rifle)."~~

CE 542 XVII, 241

Rifle C-250. "Replica of the C2766 rifle." "A similar rifle" ordered by the FBI from Klein's Sporting Goods.

Testimony of Robert A. Frazier, FBI Laboratory.
March 31, 1964. III, 396.

CE 574 XVII, 258 CE 558, XVII, 249

"Clip from C14 rifle loaded with six cartridges." C14 seems to be the number given the C2766 rifle when tests were made with it. An FBI number? Have been unable to find any explanation of this number. Frazier identifies C-14 in CE 565 as "cartridge case which I fired in 139." (III, 428) However, he identifies C-14 in CE 559 as "cartridge case 543" (one of three cartridge cases found in TSBD) and C-6 as "test cartridge case, fired in Exhibit 139". (III, 419) Says just the opposite in III, 421.

Testimony of Robert A. Frazier, III, 390 to 441.

(Testimony also in vols. V and VII; have not checked.)

CE 139

CE 572

XVII, 258

"two test bullets fired from the C2766 rifle for comparison purposes"

CE 573

(Walker bullet)

Frazier: "It is a copper-alloy jacketed bullet having a lead core."

Q: "Can you think of any reason why someone might have called this a steel-jacketed bullet? Frazier: "No, sir; except that some individuals commonly refer to rifle bullets as steel-jacketed bullets, when they actually in fact just have a copper-alloy jacket."

III 439

Frazier "unable to reach a conclusion as to whether or not" it had been fired from CE 139, but "general rifling characteristics of rifle 139 are of the same type as those found on the bullet, Exh. 573, and, further, on this basis, that the bullet could have been fired from the rifle on the basis of its land and groove impressions."

(same as above)
