LOS ANGELES AP - Sen. Robert F. Kennedy showed no improvement and remained in extremely critical condition Wednesday night after surgeons removed from his brain most of a bullet police said was fired by a mysterious young Jordanian.

"Senator Kennedy's condition is still described as extremely critical as to life," his press secretary, Frank Mankiewicz, told newsmen.

In Washington, President Johnson went on national television to denounce the assassination attempt.

"Let us for God's sake resolve to live the law," the President said in a brief but impassioned address. "We cannot sanction the appeal to violence."

Johnson then appointed a commission to investigate the phenomenon of violence in America.

As newsmen kept vigil in Good Samaritan Hospital, Mankiewicz reported - 12 hours after the delicate brain surgery on Kennedy - that "the team of physicians attending Sen. Robert Kennedy is concerned over his continuing failure to show improvement during the post-operative period."
