

## Senate Bans RFK Photos

SACRAMENTO — (UPI) — The State Senate yesterday voted to keep more than 300 pictures of the body of assassinated Sen. Robert F. Kennedy out of the hands of those who would exploit them for personal gain.

The upper house approved 28-3 a bill with a rider banning public display of the pictures without a court order.

The rider was inserted earlier this month after the legislation had cleared the Assembly, where it must now return for approval of the amendment.

Sen. Donald L. Grunsky (R-Watsonville), floor manager for the bill, said the pictures were taken during an

autopsy and post mortem. He said the measure would allow historians to view the pictures if they could prove to a court they had "good cause" to do so.
