

ITT-CIA Link Is Probed

## Accuracy of Testimony Questioned

by Laurence Stern

The Justice Department's Criminal Division has opened an inquiry into the accuracy of testimony given a congressional subcommittee in 1973~~3~~ about the International Telephone & Telegraph Corp.'s relations with the Central Intelligence Agency in Chile. ....

[Among those testifying before the subcommittee were Harold Geneen, ITT board chairman, and William Broe, then head of the Latin American division of the CIA's clandestine service. Story suggests they both committed perjury.]

Later clippings on this will be filed Chile.
