WASHINGTON Take 2 Would Be Assassins Bit A223WX: Kennedy." 250

The would be assassins seek to be identified with

'pseudo-communities?' whose members include the president and
national or international figures such as 'Fidel Castro, Robert
Rennedy, Mikita Khrushchev, Martin Luther King, Madame Mhu . ." the
report said.

Here are some other elements in the report's profile of a potential
assassin:

His age can range from 14 to 76, with the median age around 26.
He's more likely to have come from a broken home and chances are
high that he either never married or has been divorced or separated.

There's at least one chance in ten that he has a record of sexual
offenses or diviations; and an even far greater chance he never
established satisfactory man-and-woman sexual relationships.

There's an 8 per cent chance he was dishonorably discharged from
military service; and more than likely he's unemployed.

His target may be a nigh-placed politician, but he himself never
took part in politics, and any religious affiliation is vague.

His target may be an any religious affiliation is vague.

Thaving a record of previous mental illness, more than likely he's
a schizephrenic; there's a 22 per cent chance he's a chronic
alcoholic or other addict; and he's likely precccupied with death
and sucide.

Threats against the president are not, in themselves, evidence
of mental illness and only a small proporation of threats eventuate
into'serious assassination attempts,'' the researchers said.

But they added that the record of presidential assassinations shows
that 'Most of them have been made by mentally disturbed persons and
have been preceded by threats and gestures.''
