Computers and Automation  
Subscription Department  
815 Washington St.  
Newtonville, Mass. 02160

Gentlemen:

Kindly note the enclosed reproduction of order forms with \$13.50 covering check (which has been cancelled and returned) which were sent you last October 29.

The back issues for August and September have been received as ordered.

However the subscription apparently got sidetracked and has not been entered, nor has the July issue, selected as a premium, appeared.

It would be much appreciated if you would investigate this matter ; if the subscription has not actually started, please make it retroactive through the October issue ONLY if October and/or November contain articles on the assassinations or related matters.

I am deeply grateful for your interest and efforts in this direction and would not want to miss any of the excellent material you have been publishing along these lines.

Sincerely,

James D.. White

October, 1970

Dear Friend,

In the May issue of "Computers and Automation" we published an important article, "The Assassination of President Kennedy: the Application of Computers to the Photographic Evidence", 32 pages long, by Richard E. Sprague, a computer professional. The article has received world-wide attention.

In the July, August, and September issues we have published additional important articles on political assassinations and conspiracies relating to them (see enclosed list of titles and authors).

In forthcoming issues we shall publish more information on this subject. We shall devote a portion of our magazine each month to coverage of political assassinations and other concealed and illegal activities, and the application of computers to the evidence.

We believe you are interested in this subject; and so we think you might like to subscribe to our magazine. The yearly rate (U.S.A.) for 12 issues is \$9.50. We invite your subscription, and we offer you a FREE COPY of one of the important back issues (as long as the supply lasts) if you subscribe in the next three weeks.

May we hear from you soon? An order form for your convenience is below.

Yours sincerely,

*Edmund C. Berkeley*

Try Computers and Automation at no risk!

If the magazine at any time does not meet your needs and expectations, you may cancel your subscription and receive a full refund on the unmailed portion.

# COMPUTERS, SCIENCE, AND ASSASSINATIONS

IMPORTANT INFORMATION PUBLISHED IN COMPUTERS AND AUTOMATION, MAY TO SEPTEMBER, 1970

## MAY ISSUE:

The Assassination of President John F. Kennedy: The Application of Computers to the Photographic Evidence, by Richard E. Sprague

A reexamination of some of the evidence relating to the assassination of President Kennedy, (1) showing how he was shot in a crossfire in Dealey Pl., Dallas, Texas, and (2) asserting that the Warren Commission conclusions that Lee Harvey Oswald was the sole assassin are false. Publication of eleven revealing, historic photographs. An analytical tabulation of over 500 photographs taken of "the most photographed murder in history." Analysis of the possibilities of computerized analysis of the photographic evidence. Computer-Assisted Analysis of Political Assassinations: Editorial, by Edmund C. Berkeley  
Reasons for such analysis and the possibilities arising from it.

## JULY ISSUE:

The Impact of the May Article on "The Assassination of President John F. Kennedy"

Report on the news coverage of the May article in over 35 newspapers and magazines.

More About Jim Hicks, by Richard E. Sprague

Jim Hicks admitted being the radio communicator among the firing teams in Dealey Plaza.

Visual Re-Creation of a Scene, Using Computer Graphics, by Leslie Mezei

The technical possibility of transposing the picture content of 360 still photos and 140 movie sequences averaging 300 frames, into motion pictures reconstructing what happened in Dealey Plaza.

Confirmation of FBI Knowledge 13 Days Before The Dallas Assassination of a Plot to Kill President Kennedy

Facsimile of Warren Commission Document 1347, U. S. Archives, showing that the Warren Commission knew of a plot by Minutemen and others, to kill President Kennedy in November, 1963.

The "Second Conspiracy" about the Assassination of President Kennedy, by Richard E. Sprague  
Evidence of the "second conspiracy", involving President Lyndon B. Johnson and many other persons, to "cover up" the first conspiracy on grounds of "national security".

## AUGUST ISSUE

The Assassination of Senator Robert F. Kennedy: Preface, by E. C. Berkeley

The suppression of important material evidence. Sirhan's gun could only hold eight bullets; yet ten bullets were found, and are here identified and listed.

Two Men with Guns Drawn, at Senator Kennedy's Assassination: Statement, June 4, 1970, by T. Charach

One witness reported that he saw a hotel security guard draw his gun at the same time of Sirhan's shooting, and FIRE AT SENATOR KENNEDY — but this witness was never called to testify.

Map of the Scene of the Assassination of Senator Robert Kennedy

Map of the pantry of the Ambassador Hotel, showing Kennedy's movements and the locations of Sirhan, the hotel guard, and witnesses, at the time.

The Pantry Where Senator Robert F. Kennedy was Assassinated on June 5, 1968: Photograph

Bullet Hole in the Frame of a Door in the Ambassador Hotel: Photograph

Two Bullet Holes in the Center Divider of the Pantry Door: Photograph

Complaint for the Disclosure of Information: Suit, Theodore Charach vs. Los Angeles Police Department  
Text of Complaint filed June 4, 1970, against the Los Angeles Police Department, detailing evidence that has been suppressed.

## SEPTEMBER ISSUE:

Patterns of Political Assassination: How Many Coincidences Make a Plot?, by E. C. Berkeley

How the science of probability and statistics can be used as an instrument of decision to determine if a rare event is: (1) within a reasonable range; (2) unusual or strange or suspicious; or (3) the result of correlation or cause or conspiracy.

Four cases:

The Deaths of 15 Russian Generals, April-May 1969

The Deaths of 28 Black Panthers, 1968-69

The Deaths of 400 German leaders, 1918-32

The Deaths of Two Kennedys and Martin Luther King, 1963-68

Computer-Assisted Analysis of Evidence Regarding the Assassination of President John F. Kennedy — Progress Report, by R. E. Sprague

The nature and progress of a computer project initiated summer, 1970, at the National Committee To Investigate Assassinations, Washington, D. C., analyzing evidence in the death of President Kennedy.
