Doctor Disputes Kennedy Report

Pittsburgh, June 11 (AP) - Dr. Cyril Wecht, saying that his views of President Kennedy's murder were distorted by the Rockefeller commission [on CIA intelligence activities], wants the commission to release a transcript of his statements.

....

Dr. Wecht denies the statement by the report [made public 10 Jun] that he "testified that the available evidence all points to the President being struck by two bullets coming from the rear, and that no support can be found for theories which postulate gunmen to the front or right front of the presidential car."

Dr. Wecht said that was a "flagrant" misrepresentation of what he told a commission attorney, Robert Olsen, in a five-hour interview on May 7.
