Dallas, Tex., July 28 (AP) - A woman from suburban Irving says she saw Lee Harvey Oswald driving an automobile two weeks before his arrest as the accused assassin of President John F. Kennedy.

Mrs. J.T. Hunter challenged the claim of Oswald's widow, Marina, that he was unable to drive. "I saw him behind the wheel," she said in a Dallas News interview yesterday.

..... Mrs. Hunter said she was in the Furniture Mart, an Irving store, when she saw Oswald drive up and after asking about a part for a gun, drive away.

Mrs. O.H. Whitworth, who owned the store at the time, said Oswald entered carrying an object she said looked like part of a gun wrapped in paper. He then inquired about furniture, she said, and left to bring back his wife and two young daughters.

..... Mrs. Hunter and Mrs. Whitworth gave statements to the FBI in December. "There's no doubt about Oswald being the man who came into the store," Mrs. Whitworth said.

After appearing before Warren Commission investigators for the third time Friday in Dallas, Mrs. Oswald was taken by Secret Service agents to the Irving store.
