Grabs FBI File
On Himself

Washington

The FBI said yesterday that Representative Robert Drinan spotted a background file on himself on a tour of the agency and — over the protests of his hosts — began looking through it on the spot.

The incident occurred Tuesday on a tour of FBI facilities by members and staff of the House Judiciary Committee.

Drinan, a Massachusetts Democrat, later sent a written demand that FBI Director Clarence Kelley bring the Drinan file to yesterday's hearing, but Kelley refused.
