Impeachment - ACLU of Northern California asks members to continue to write their congressmen on the matter of impeachment, says letters to congressmen in Northern California have dropped 70 per cent since the first week in November (22 Oct to 1 Nov); see story for sample figures. ACLU News says the national organization is conducting impeachment campaigns in every state in the country.

"There is more than enough evidence right now to make it necessary for the House to draw up Articles of Impeachment and bring Richard Nixon to trial before the Senate. Further investigation and hearings by the House Judiciary Committee are unnecessary. What is necessary is a deliberate determination by the Senate of whether the actions Nixon has already taken and admitted are to be permitted under our Constitution."
