The Major Events of the Day

International

Secretary of State Kissinger is in New Delhi after three days of talks in Moscow with the Soviet leader, Leonid I. Brezhnev, in which he believes the United States and the Soviet Union moved substantially closer to finding a formula for new limits on strategic weapons. But Mr. Kissinger's reception in India was cool, with Prime Minister Indira Gandhi planning to fly to Kashmir tomorrow, in the midst of his visit. [Page One, Col. 8.]

King Hussein of Jordan, and the Palestinian leader Yasir Arafat, taking equally adamant positions, told the Arab heads of state at the Rabat, Morocco, summit conference that they must choose between them. Spokesmen for both the King and the Palestine Liberation Organization said they would accept no compromise. [1:6-7.]

Five of the 22 hostages being held by four armed convicts in a Dutch prison chapel have been released unharmed. The 17 remaining hostages are reportedly being treated well by their captors. [1:4.]

West German economic uncertainty and a threat of growing unemployment cost Chancellor Helmut Schmidt's Social Democratic party seats in the state legislatures of both Hesse and Bavaria, in the first test of the voters' mood since last spring. In Hesse the opposition, the Christian Democrats, pushed the Social Democrats out of their position as the biggest party there, for the first time in 28 years. [1:5.]

In a candid interview on Canadian television, Margaret Trudeau told how the "frightening" strains of being the young wife of a Prime Minister had contributed to her recent hospitalization for psychiatric treatment. [1:7-8.]

National

Each year, an estimated half of the world's critically short food supply is consumed or destroyed by insects, molds, rodents, birds and other pests that attack the foodstuffs in the fields, during shipment or in storage. Experts believe that control of a part of these losses may be the quickest, least costly way of substantially increasing the food available to the millions of hungry and malnourished people throughout the world. [1:1-2.]

High-quality oil has been discovered at two widely separated locations in the Norwegian Sea, raising the possibility of extensive petroleum deposits under those deep-sea areas.
