## The Major Events of the Day

### International

Israel and Egypt formally initiated a new agreement providing for Israel's withdrawal from some occupied territory in Sinai in return for modest Egyptian political concessions and major pledges of support from the United States. The accord was a foreign policy achievement for the Ford Administration. [Page 1, Column 8.]

Clearly pleased at the completion of the new interim agreement between Israel and Egypt, President Ford hailed it as "one of the most historic" peace ventures of the century. In telephone calls from Camp David to Premier Yitzhak Rabin of Israel and President Anwar el-Sadat of Egypt, Mr. Ford pledged to do all that he could to assure the success of the latest accord and to continue building momentum toward a permanent peace in the Middle East. The Administration immediately began a campaign to persuade senior members of Congress that the agreement could not have been arranged without an early warning system in Sinai as a central element and without a symbolic United States role to demonstrate a commitment to both Egypt and Israel that the warning system would be operated impartially. [1:4.]

Secretary of State Kissinger, in a long message to the United Nations, responded to demands from developing countries for radically new ways to bridge the chasm between rich and poor nations, and outlined the broadest set of specific proposals on cooperation with developing nations that the United States has made so far. The address was delivered by Daniel P. Moynihan, the chief United States representative at the United Nations, who was one of the first speakers at the opening session of the Seventh Special Session of the United Nations General Assembly. [1:3.]

President Guillermo Rodriguez Lara of Ecuador crushed a revolt by troops led by Gen. Raul Gonzalez Alvar, the armed forces Chief of Staff, who seized the Government Palace in Quito, but were surrounded and forced to surrender by loyal troops. It was estimated that 12 persons were killed and 80 wounded. General Gonzalez, who was taken prisoner, had announced in a radio communiqué that he had moved his troops against the President because of alleged mismanagement of the country's rich oil resources. [1:7.]

**Metropolitan**  
A \$2-billion financing plan to get the money-short city through the next three months, and a law to delay payment of some city debts if the money cannot be raised, were proposed by Governor Carey. Most details were not disclosed. The financing plan would include a mandate, to be voted by the special session of the Legislature that Mr. Carey has called for Thursday, ordering Controller Arthur Levitt to invest some state pension funds. [1:1.]

The new fares on subway, bus and commuter lines here went into effect smoothly, their impact eased by the holiday half-fare rates. Subway token agents and transit patrolmen relaxed after dealing with the long lines of Sunday—the last day of the 35-cent fare—and braced for today, the first workday with a 50-cent fare. [1:2.]
