

The Major Events of the Day

International
 The 30th General Assembly of the United Nations ended its three-month session, marked by frequent acrimony and confrontation, and the United States called it "a profound, even alarming disappointment." The chief American delegate, Daniel P. Moynihan, told the Assembly it had been repeatedly the scene of "acts which we regard as abominations," clearly referring to its calling Zionism a form of racism. [1:5.]

Officials in Moscow have been attempting privately to play down the importance of Soviet military involvement in Angola, calling it only tangential to the course of foreign policy. They said it should not be allowed to damage Soviet-American détente. Simultaneously, they have stressed to Western diplomats and correspondents that Soviet support for the Popular Movement for the Liberation of Angola in Luanda has become a matter of prestige and cannot be abandoned, especially in the face of American criticism. [1:7-8.]

National

Congress passed the tax cut extension bill and President Ford promptly vetoed it. Advocates in the House of Representatives will attempt today to override the veto. Although supporters were unable to mobilize a two-thirds majority in two earlier House votes on the bill, the view was growing that this time they would succeed. A move to override is assured in the Senate. [1:6-8.]

The long-delayed energy-policy bill to force an immediate reduction in the price of crude oil produced in the United States was passed by the Senate, 58 to 40, in its final Congressional hurdle. Although the measure has been endorsed by President Ford's chief energy adviser, Frank G. Zarb, the White House has refused to say whether he will veto it. [1:6-7.]

Lynette Alice Fromme was sentenced in Federal court in Sacramento to life imprisonment for attempting to kill President Ford there last Sept. 5. She threw an apple at the United States Attorney while he was speaking, knocking his glasses off. [1:2-4.]

The Senate unanimously confirmed the nomination to the Supreme Court of Judge John Paul Stevens of the Court of Appeals for the Seventh Circuit. He will be sworn in tomorrow morning by Chief Justice Warren E. Burger. [1:7.]

CORRECTIONS

It was incorrectly reported in some editions of The New York Times yesterday that the majority decision in the Appellate Division of State Supreme Court upholding the landmark status of Grand Central Terminal was written by Judge Harold A. Stevens. Judge Stevens concurred in the opinion, which was written by Judge Francis T. Murphy.

● An article yesterday on the risks of estrogens to postmenopausal women, the results of a study of the Kaiser-Permanente Health Plan in Los Angeles, were described incorrectly. They showed that each year endometrial cancer develops in one in 2,000 postmenopausal women who have not had a hysterectomy and who do not take estrogens. However, the risk increases to one in 250 if estrogens are used.
