FRIDAY, JULY 2, 1976

JUL 2 1976

## The Major Events of the Day

### International

Israel broke a long-standing policy and announced yesterday its willingness to negotiate the release of an unspecified number of convicted Arab prisoners in exchange for hostages, including Israelis, being held by airplane hijackers in Uganda. Soon after the decision was announced the hijackers freed 101 hostages. [Page A1, Column 1.]

The unexpected resignation of Prime Minister Carlos Arias Navarro of Spain and his Cabinet threw the Government's program for democratic change into confusion. Prime Minister Arias was a Franco appointee. His resignation was apparently the result of a decision by King Juan Carlos I. The King was known to be unhappy with the Prime Minister. [A1:4-5.]

A conflict between Canada's French-speaking minority and the English-speaking majority over the use of French in the airline industry has shaken the Government of Prime Minister Pierre Elliott Trudeau and has set off a rebellion within his Liberal Party. The Prime Minister said the issue was the most divisive one facing the nation in many years. [A1:5.]

The United States Tennis Association withdrew from the Davis Cup organization following the defeat of two American resolutions that would have imposed sanctions on countries for withdrawing from cup matches for political reasons. Some member countries have refused to play against South Africa. Britain and France withdrew from the 1977 competition in support of the United States position, but did not withdraw from the cup organization, which was holding its annual meeting in London. [A1:2-3.]

### National

The Supreme Court in a 6-to-3 decision ruled that states may not require women to get the consent of their husbands before allowing them to have abortions. The Court also ruled, 5 to 4, that states may not impose general restrictions requiring all single women under the age of 18 to get the consent of a parent before undergoing an abortion. The rulings were made in one of two cases involving Missouri's abortion law. The Court ruled unanimously in a third-abortion case involving a Massachusetts law and suggested that states might be able to enact laws

## CORRECTION

On June 18, 1976, the Notes on People column said incorrectly that Bernard Cornfield had been imprisoned in Switzerland for fraud. Mr. Cornfield was held in prison during an investigation by the Swiss authorities into allegations of fraud.
