ixon's Performance Rat

By Mervin D. Field

President Nixon's popularity with the public in California during the arry part of August reached an all-time low, according to the findings of the California Poll's most recent periodic survey of public opinion.

While Watergate is clearly a factor, the primary cause of the public's unprecedentedly poor appraisal of the job the President is doing seems as seen and felt by the public. to be the current state of the domestic economy

(20 per cent) would say they thought Mr. Nixon was doing a "good job" as President, and the largest single group of the public (44 per cent) thought he was doing a "poor job." accorded to Mr. Nixon was the lowest recorded for him as President or for Presidents Johnson, ative sample of 1025 adults. The "job rating" California Poll interviewed a statewide represent Kennedy or Eisenhower. Just one in five persons During the period from August 4 to 11, the

The following table shows how the public's regard for Mr. Nixon's performance has declined since 1970, and particularly during recen-
