

Washington

Martha Mitchell is suffering from a blood cell disorder and is undergoing treatment at Northern Virginia Doctor's Hospital, it learned yesterday.

Mrs. Mitchell, 57, has been undergoing a series of tests at the hospital for the past month.

Hematologists made the diagnosis that Mrs. Mitchell has a blood plasma disease and has been given an "aggressive treatment."

Mrs. Mitchell, wife of former Attorney General John Mitchell, was one of the first to blow the whistle on the Nixon Administration as the Watergate scandal began to unravel.
