

What is political truth?

**Does it matter
that there may have
been two assassins
in Dallas on that
terrible 22nd of
November in 1963?**

“I have just read a book which, I must admit, shakes for the first time the belief I have had in the report of the Warren Commission. The book is *'Inquest'* (Viking), by Edward J. Epstein. It is written without hysterics or histrionics, in a style economical, unadorned, and scholarly....

“The author discovered from his interviews and from the internal evidence in the report that the Commission and the staff did a needlessly sloppy job...that they may even have tampered with the autopsy report....

"Why? The author's answer is partly that the staff defined its limits of investigation too narrowly...that the Commission did not conceive its task to be the establishment of the truth, whatever the consequences, but the establishment of the *political* truth."
—MAX LERNER, *New York Post*

"...the first book to throw open to serious question, in the minds of thinking people, the findings of the Warren Commission."
—ELIOT FREMONT SMITH, *New York Times*

**With FBI photographs and documentation
never previously available**

At all bookstores *Illustrated* \$5.00
