concluding volume
in one of the
most significant
works of our time*

THE AUTOBIOGRAPHY OF
**BERTRAND
RUSSELL**
1944-1969

THIS final volume of Lord Russell's autobiography may have the widest appeal of any. For in it Lord Russell deals not with the distant past, but with struggles and ideas still going on—struggles and ideas that have made him one of the controversial figures of our time.

His account of forming the Who Killed Kennedy Committee and of seeking to bring the United States to trial before an International War Crimes Tribunal for its role in Vietnam have an immediacy and relevancy—especially for the young—that sets this volume apart from its predecessors.

Here is a fitting climax to the record of an incredibly long, utterly fascinating and completely rewarding life.
