LOS ANGELES AP - Sen. Robert F. Kennedy
failed to show improvement Wednesday after
surgeons removed from his brain all but a
fragment of a bullet police said was fired by a
mysterious young gunman with a Jordian heritage.

Sen. Kennedy's condition is still described as
extremely critical as to life,' the senator's
pressy secretary, Frank Mankiewicz, told newsmen.

The team of physicians attending Sen. Robert
Kennedy,' Mankielcz said in a brief
statement, 'is concerned over his continuing
failure to show improvement during the
post-operative period.'

But the press aide, answering questions some
17 hours after Kennedy was cut down in a Los
angeles hete, would not say Kennedy's condition
is deteriorating.

"We felt it would be appropriate at this
point,' he said, 'to stress that the critical condition
related to survival during this period as well
as to the period beyond.'
Mankiewicz said although 'there might have
been some change,' he thought Kennedy's life
signs - pulse, breathing, blood pressure - were
still good.

Earlier, Kennedy underwent a series of medical

signs - pulse, breathing, blood pressure - were still good.

Earlier, Kennedy underwent a series of medical tests at Good Samaritan Hospital. Then, too, they showed no measurable improvement. The man, etc. 6th graf A060WX.
