

## Connally Disagrees On Shots

AUSTIN—(UPI)—Texas Gov. John Connally took issue Sunday with the Warren report's conclusion that the bullet that struck him had passed through President John F. Kennedy first.

Connally said he was hit by the second shot.

He said he couldn't have been hit by the first shot, because he had time to look behind him, and swivel to look the other way, after it was fired.

**HE SAID** he was already wounded when the third shot hit the President.

Connally said he agreed with the report that Oswald killed the President, and was acting on his own.

The report concluded that one of the three shots fired—which one it could not say—missed altogether. The report said the first bullet to strike passed through Kennedy's neck and then hit Connally, who was sitting on the jump seat in front of him.

A succeeding shot, both the Governor and the report agreed, shattered the President's skull.

**"I'M CONVINCED** beyond any doubt that the first shot did not hit me," Connally told a news conference.

The report was "somewhat critical of the Dallas

police and district attorney," he noted.

"And in a way, this is unfortunate. The report should be read in the light of the time when the events occurred.

**"PANDEMONIUM** existed; People wanted to find someone to criticize

and, with no facts, their reaction was to lash out against Dallas.

"This man (Oswald), Marxist, deranged man, was not a product of Dallas, of its schools, of its environ-

ment or its culture," he said.

"To condemn a great city because a man like that chose the city to do this thing does the city and state a great disservice."
