

**'Stun Guns' Recovered;
Couple Accused of Theft**

MIAMI, Oct. 1 (UPI)—The police have recovered seven of nine electronic "stun guns" and arrested a young couple in connection with their theft and use in a service station holdup two weeks ago.

Elizabeth Ann Bruce and Thomas Pannier, both 24 years old, were arrested at their apartment yesterday after William Lawson, 27, the holdup victim, identified Miss Bruce from a police mug file.

The weapon used in the holdup was subsequently traced to a Miami Beach distributor that had been burglarized Sept. 12. Nine of the flashlight-like guns were allegedly taken in that burglary, but the police only recovered seven from the Pannier-Bruce apartment yesterday.

The stun guns — so-called because they shoot out dart-tipped wires that discharge a 50,000-volt electrical shock that immobilizes the victim — can be obtained only through the manufacturer.
