JAPANESE REPORTS PHOTOS OF 'SPIRITS'

TOKYO (Reuters)—A 61-year-old Japanese photographer says he has taken hundreds of spiritualist pictures using a technique that may even be used to find the assassin of President John F. Kennedy.

Yaiohird Kobayashi, also an archeologist, said he believed that the face of the assassin and any accomplices would appear in film if shot with his ordinary 35-mm. camera at the spot where the President was fatally wounded in Dallas on Nov. 22, 1963.

Mr. Kobayashi, son of a miner and born in Sapporo, Japan, said, however, he wanted no part in crime detection because he did not want to make enemies.

Teruo Mizuno, manager of a camera store in Tokyo, handles the developing of Mr. Kobayashi's films. Mr. Mizuno said he did not know whether the filmy substance forming the faces shown on the many photos had been caused by spirit photography. It might be a result of light or shadow, he said.
