

8/3- awaiting P.M. for out midday dip, time for a couple of curiosities. Jerry Ray is now writing me that it is a ~~ksuake~~ mistake to consider all blacks dumb. Without inspiration, and while living with (and on) Stoner/RSRP. He also indicates I have not received everything James has sent me, something I've been awaiting for months...I have been friends for years with Bill Joeb, Manchester Union-Leader, who has in many small ways befriended me. Had it not been for a slipup in his office. Regnery would have done WW end 1965, through him. Well, I have the Partin deposition, think most of it will hold up, and some is susceptible of independent authentication. Lawyers not well enough backgrounded to do as good a job as possible, but it is explicit enough on the framing of Hoffa by the DJ under RFK, and I have no trouble believing it, having believed it independently. Have you any idea where Sheridan now is, what he is doing, whether with NBC? HW
