

9/18 Je, please don't go to any trouble for me with the NYT for Mon through Fri of this week.* I have it. A correspondent friend, British, who assumed my Attica interest and planned coming here for supper tonight (we could even swim a bit!) brought them with him and Lil has about finished clipping. I understand the Attice reporting is excellent. I've not had time to read. Perhaps the explanation is that it is under the metro rather than the national desk. Also, today I learned that the quality of the TV40 is much, much better than that of my larger machine. I have a very bad tape from the ungilded cage, almost incomprehensible. Tomorrow I'm going to try to use the earphone and see if it helps. It is where the tape is so poor that any improvement in quality can be so important! Again thanks. HW ~~SEP 20 1971~~

~~SEP 22 1971~~

* Sep 13 through 17. Will you be getting later copies ~~for you~~? If not, will you want us to copy? Let us know - won't do anything until we hear. And let us know the last date you have, so we won't duplicate.

Unless you see something special, don't go to the trouble. That Wicker column was beautiful. Anything exceptional on the evidence, please. It is only so I can help these people who are so hard to help and who are so reluctant to trust or listen to anyone white.
