

9/30/71-Herewith valuable clips on early Galt hunt. Several valuable things in them of which I may soon be writing Ray. There are two different sets of sketches. I have the histories traced. The finding of the shell on the floor destroys the story and proves the gun was planted, if true, for a shell was found it it, not a live charge-and no clip or fresh cartridge. I'd heard this but didn't have anything on it. The sheet of 4/18 typed copy is partly legible as I copied it, but it will do. Hurrying to clean this up before leaving for DC and out annual checkups so no time to do memos now. Wonder about sending this to R at this stage. This all confirms what I'd earlier learned, they were immediately on the trail they were supposed to be on. Thanks, H.
