If you want the Potomac piece on Lansdale and don't mind my markings, don't bother returning it. I have a duplicate, thanks to Ian, and I've put it with thing Howard will want to see. If he wants it he'll take it with him and extract or copy. HW 12/24/72

Broder has a long piece in today's Post on what I'd pointed out earlier, that Nixon is placing his trusted, his automotons, his hatchetmen or whatever you would call them, in ket positions throught the government, by-passing the normal workings of the agencies and frustrating the limited possibility of the Congress doing anything about it. Should you later want it, I have it in the Authoritarianism file.
