

Can't for the life of me remember why  
I sent you copyright pages of Dell  
edition WW or asked its return! <sup>2/9/72</sup>

Pleasant surprise for me may be  
for you. I have a friend with Paci-  
fica Foundation, not the station, in  
SF. They will have 15,000 on compute:  
tapes in April sometimes and I can  
have access to the index and poss.  
dubs. I said I might ask a local  
friend to consult. Interested,  
local friend? And they are making  
changes in your station, the error  
having been recognized, if not felt.  
When I repeated your comments, with-  
out attribution, affirmed. He is good  
guy, Bill Stein. The woman was fired  
over somebody's ego! His opinion of  
her= yours. I'll know when the index  
is done. Their plan is to sell the  
programs to other stations, esp. col-  
lege, good idea. Bill dropped in  
unexpectedly. He had to be in Wash.,  
which is 50 miles away but no more in  
time than normal travel out there or  
any other metro. area. Just left.  
Also, I have the VOM recorder back.  
There is a China special on tonight.  
I'll see if it records. It has not,  
intermittently, since new, and I sent  
it back because it didn't record on  
one of the most important times, a  
thing I'll never be able to duplicate  
If it is fortunate I decided to tra

transcribe on the spot and this, while all was fresh in my mind could make notes, it is also not as good or as complete. Anyway, after 2 mos. factory says only "checked ok". H
