

JAN 13 1972  
1/11/72 I've been kinda dimwitted.  
I should have asked you to tape every interview with Lattimer, who seems not to be shunning them, and rush to me, please. His self-revelation on WNBC last night was incredible. This guy doesn't know anything, is long on hangup, and is the perfect one for someone else to use, a fear I cannot get out of my mind and find not unreasonable. If you know any stations that have already used him, and the people well enough to get any outtakes they may have saved, even better. The letter I wrote him may cool him, but I've already got one laying for him, to just let him talk and talk and talk and talk more. HW  
PS Doctor saw thumb today, and so did I. Getting along great. About half again normal size, cut all the way across and a third through, but clean and healing well. Stitches to remain at least another week.
