

Hoppe on the "oodle Bill and org confronts me with a most serious problem: should I let Lil read? She has such criminal tendencies. The most immediate concern is BROWN rice (wogstuff). She is hooked on that ~~WOG~~ (org) which we get from a natural-food company (ORG itself!). But maybe there is hope. The last batch had bugs in it and I'm feeding it to the birds. There may be moral questions about feeding such things to wildlife that I may have to face at some time, but meanwhile, the incriminating evidence is disappearing, slowly but regularly. I guess this on turn reflect the patriotic fervor and common sense of the birds, whose preference is for corn saturated with contaminants and stale commercial bread from which many nutrients have been removed (Is there yet a law against subverting birds?) Has the paper yet promoed with the lone Where There's Life There's Hoppe?

HW 1/11/73
Thanks for envelope report. Will restrict or wrap with tape.

JAN 12 1973

5-7

I have what is of interest in NYTimes 1/8-11. Howard is returning home tomorrow. While he was here he got it and clipped for me.

Mailing 3class S tonight. T will have fantastic Post raves over Shenyang (they ain't called Shenyangians, be they?), with large p.1 photo spread. "egar saw them last night and said simply can t be described.

While WG trial lasts at least 5 days weekly I can get extra Post and will. Lil checks as I drive he: to work to see if I should get an extra copy. Like in Modern Times? Or didn't they show that Chaplin in China? Best HW 1/11/73

JAN 12 1973

1/12/73, 3+ p.m. JUST BEFORE THE RADIO ⁵⁻⁷ OF the second Newsday story. It makes no sense, but the plea-copping after Hunt and by his colleagues of the past does. Ian is not in. He was to try to get the first and I'll ask him to get this. The trial is going like a three-week novel! By Hunt yet. It looks more and more like Lid.y would not take a dive and will get concrete shoes instead. He doesn't want to be disabred, among other things. I suppose the a.m. Post will have the essence.
