

While Howard reads a few pages we will then discuss, this update. Lesar is going to file under FOI for me for the classified pages about which Ford swore falsely under oath Monday. You have a few of these, where I tried to get the Executive session he used and could not and charged they gave him an exclusive copyright on TOP SECRET info. Because this is what Jaworski also suppressed, we think that after two years they have had time to do something about their last letter. Their regulations require them to forward the appeal if it is rejected. I have just finished copying all the relevant letters for Jim, who will be here in the a.m. on this. In the course of it I found that the Archives had neither of the stories over which Jaworski was upset. He surely is one of the world's great investigators. HW 11/11/73
