

OCT 22 1976

JDW: I've had your 101/0, fascinating, on the desk since receipt hoping for a time when I'd be able to respond as I'd like. Lil was interested in it. Her sister was up from just below Hampton Roads for several days. She and her ultra husband told Lil these kinds of sightings are commonplace in that area and not questioned by any they know. I was not here the night they went out to supper. It is the night I addressed the seminar of the Fund for Adv. Journalism last week. If these people and their friends are without question about UFOs then you can be sure few of the right are...What was of particular interest to us is the reasonable interpretation of the significance. I had never taken the time to think it through. To create and operate such devices requires a superiority to earth man's intelligence. As I look back these observations followed our development of atomic/nuclear capabilities...Ross Monroe is now a National Public Radio correspondent in China. By accident, because I was walking and using leg muscles at the time he was aired this evening, I heard him for the first time on NPR. He said the anti-radical demonstration he had just seen was the most enthusiastic he had seen since going to China on the event there is no print-news coverage of his I see. Best, HW 10/21/76
