

Current TIME has review of The Plot to Sieze The White House. Cute review, Criticizes committee for not naming business/finance conspirators (Paine, Webber) but itself fails to name. I think I have referred to this plot, a very real one, before. It was to use Smedley Butler, then Phila. chief of police, as The Man on The White Gorse. I've often wondered why the reporter ~~oin~~ on this Paul Comly French, then Phila Record, never did a book. When I last saw him, he was on WPA, the Record had folded, and I, too, could have done a book on this years ago. Somebody should have, before WG. HW 9/5/73
