

HW:

Received today from Lesar the Hunt witness summary, plus a copy of the CARIC bulletin, Counter-Spy. Both look extremely interesting, and please thank him for us when you have an opportunity.

Just found your 2/174 note on gasoline cans, and thank you for the thought. We have three or four good gallon cans, metal, plus a 2 1/2 gallon plastic can we used to use for water on trips. Even so, we haven't considered seriously trying to lay in a supply of reserve gas, partly because our situation isn't yet serious, but mostly because of the danger involved in storing it. We have no separate structure where it could be stored, and I just don't like to have combustibles on hand and ready to fuel a fire beyond the minimum necessary in paint thinner and a little fuel for the camp stove. In any case it was most thoughtful of you, and thanks.
