

HW:

At 1 a.m. today, PDT, KRON-TV aired the Tom Snyder talk show, "Tomorrow" with McCord as one of three guests. McCord was on about 25 minutes in all and I doubt if he said anything he hasn't said in his book.. The two things that stick in my mind as to what he said are 1) his repeated assertion that he believes GL knew about WG and the coverup from before the breakin, and 2) a strong statement that there will be further blockbusters disclosed, probably during the House impeachment debate and during the Senate trial. The clear implication was that if no one else sprang one, he would. We both felt this could have been some kind of counterattack on behalf of the much-pummelled CIA faction GL & Co have been belaboring. We taped this and will keep it around, and if you need a dub, just say the word.
