

Sorry about the ribbon trouble I've been having again. Finally got the t'writer store to take one of their 16-yd ones and make me two. Even the 14s stretch enough on this machine to overwind with the snap that remains essential on this odd machine. See how this arrangement works. Afraid to compress the holder any more. But from the very practical snap suggestion I guess you have had similar experience. Probably won't get any less use because half won't be drying out. H

From the entertaining to the new the clips with your 17 good. Thanks. Thanks also for the KPFA report. I don't know why they decided against using the whole tape after holding the story to do it but I don't care...That Ford had Olson's there today significant. They don't want any trial and all that can come out in one.
