

JDW: The mail remains heavy, the orders hold up and with what I can do of the outside work there is little time for anything else. I am intrigued by the delay in the issuance of the Rock. Com.'s Report and by ~~indications that may or may not be~~ indications it may never be issued. There may or may not be think pieces or reporting on this but if you see any I'd welcome, as any thoughts you have. Summer weekends are not good news days so there may be nothing, not immediately. There may also be internal pressures to release. Or a short-term reason for delaying...I didn't have time to alert you to Eason show. I'll be doing it again if and when Garry Wills does reply. That colum apparently didn't appear out there until 6/3 from what Eason said. Best HW 6/6/75
