

JDW, HR: WxPost killed any reference to Newsday syndication, for today. Another due to appear today, syndication for tomorrow. WPI had condensed version I've not seen...The DJ reply brief in the spectro appeal is the most incredible I've seen. Overt and repetitious falsity with enough of it already in the record. It includes a virtual admission the FBI did not investigate the JFK assassination properly, claiming only that it is irrelevant! It may have turned Newsday on all over again! I'm sending. It turns out I've forced everyone connected with this into an early retirement, in his 50s, according to their brief: Frazier, Gallagher and Willism. (The FBI lab sure wears them out fast!) If we get a good panel much is possible. So is it with a bad one, like Danahers. Oral arguments in about two weeks. HW 2/2/76
