

JDW: Many thanks for the helpful NYTimes clips on the FBI. Didn't get to them to now because I wanted to read with more care... One of the DJ lawyers was glad to be assigned to that NY "investigation." It kept us from calling him a perjurer to his face yesterday. So I did it with him in NYU. Or at least they said he was in NYC. One of Pottinger's gang. I almost said people. "one of them are. What terribles they are. The absent one, Stephen Horn, swore that he knew of no other files-anywhere-except those he said he searched for me. I found 7 by number and more than a dozen by name in the tiny fractions + got... So don't worry about all those persecuted FBI agents who only did their duty, to be robbers. With him in charge of the prosecution, they are safe. Thanks, HW 9/18/76
You probably will not see his name but it is
