Dear 'im, 1/15/77

Your 1/12 is both helpful and timely. Your Mark is a breed not known to me herebouts. I have friends who sell equipment, honest, decent people, but they do not service it. There are a few in the area who render decent service but they are busy eneight to restrict themselves to what they sell.

While I could drool over the Sony you marked and my own reading indicated is best for my purposes, unless an exceptional item presents itself, like the fantastic Hitachi Jim brought back from the Orient, X your initial advice is sound, more so when supported by Tark, and it is what I will do. I'll put that in the better hi-fi and depend on it for most of the taping.

If this committee centinees and then breadcasts, neither of which now appears to be at all certain. (I have not copies the very bad press Sprague is getting hometown for you but is is surprisingly adverse and quite reasoned and reasonable.)

I've been partial to Seny since that TV 40 you gave me. What incredible performance! And how much use! I made a mistake with it, sending it for service when the volume control developed an intermittent. It eas returned after a \$35 charge entirely inoperative. The student who was to take it back has not. He has premised to. I did get a 55 out of town in an emergency, when I had not carried a machine expecting one to be available and it has been flawless except for a couple of minor flaws built-in, like the auto shutoff not working. So if I need to make a chance and there is not some exceptional stuff available either Sony tape recorder and that fantastic machine you marked will between them take up less space than the old Zenith I now have on the desk.

Actually I plan other changes that will enable me to monitor and tape more should I want to. We have an old and well-used portable TV in the bedroom. it is one of the first intended for vacation use with an external battery with built-in recharger. Very small picture. My office is off the living room so when Lil wants to take in some of the good BBC stuff presented by public TV she uses this set, which is adequate but has a rather small pictures. She semetimes has difficulty tuning it as she selects the public station whose signal is then better. For about \$100 I can get her a good set on which the tuning is not as automatic on UHF as on VHF, I Zenith this old friend of ours sells and services, eliminating the service problem. I'll then out this old little GE next to the radio and be able to tape from both. The TV is actually smaller than the radio. By a fortunate fluke without extra cost when I had the TV mast put in on the roofer's urging we have a devise that splits the signals and will serve more than the two set we have on it. "eaning, I think, that for the cost of the wiring I can have it connected in my office, And that means that with the automatic volume control on the recorders I can tape from public TV nights at my desk while I work on something else. During the WG hearings this was nightly from DC.

So thanks for the sound advice. I've already arranged for an overhaul of this old but apparently good Zenith radio by my Zenith dealer friend when he is here. e says he san fix if for use with the extrnal aerial that is 40 feet skyward when I had to arrange that to give Lil a good UHF picture. All that know it needs is a new valume central and perhaps dust cleaning.

There was another value in that little catalogue. I now know what Sony offers in CB. Not what I need. Need is not the word. Want for any possible emergency. Whatever it is elsewhere here the emergency channel is 9. Sony provides for 7 and 11 only. Twice this morning we had temperary phone outages. If as I now plan I get something like this it is in the hope of never using it. The yakking means nothing to me. There might be a time in the future whem I might get a pocket one for when I am walking or mowing so Lil can call me if she wants me mf or a caller does his would entail only an enexpensive pocket-size set. By the time I've walked a mile up the mountain I'm in dog country and have to turn back without a weapon to protect myself with. (I've bought some old-fashiened overalls and when the roads are clear I'm going to try walking again. Better than exercycling, I think. So many taknes. Best,

Old Receiver Read:

It fascinated me, too. From the time I first saw the sign, when my initial reacation was to retrain regret it was not Deceiver.

But I've found nobedy who has the i slightest idea of why the warm name.

I think that when I'm next in town and near the county office building I'll ask there. It is a strange one.

The one possibility I did not initially discard may carry you back to your youth. There was a time when country families had a cow or two and sold cream to dairies for butter. To simplify collection they took their cream to collectors who were visited by the agents of the creameries.
