

From the Unreal World: Today's WxPost has a story saying that Miami States Attorney Gerstein (old friend of Bud's from Senate days) questioned McCord in Bud's office yesterday. Two days ago I asked Lesar if Bud had had McCord, an authentic expert, make an electronic sweep of Bud's office and home phones. To the best of Lesar's knowledge Bud hadn't and even his secretary has been demanding it. Aside from reasonable suspicion this would be par from his representation of me vs DJ, FBI and of Ray, he knows that the USAtty told him when I was in his office, which would have been from shadowing or tapping/bugging. All the lemmings are not in N.O. and Miami. HW 5/1/73
