

before Sirica the day before I find what could be an interesting reference to a few pages we should have if they are not too much trouble to get. In Bittman's plea for Hunt he went into Hunt's CIA career. He talked about Guatemala and Cuba, I presume no other such operations. However, in view of the reluctance of anyone to let any of this be generally know, I think it should be studied. Bittman's past and the previous connections of his firm both indicate this also. I don't know if the transcripts are in the library or not. If they are it should be a simple matter for Dick to get these. HW 10/6/73
