Colson, Hunt - filed Cover-Up, W.H. 6/20/73

Lyndon's MYFimes 6/8/73 Colson Says Dean Urged Bunt to Fice the Country is in many ways fascinating, probably fairly dishonest, and gives an interesting self-portrait as it does insight into the frame-up(s).

From this I'd say Colson is not as sharp as he is reputed to be or is out to get GL as well as phrlichman. For several weeks I've had a feeling that the first of the top dogs to be heaved from the troiks will be Ehrlichman. Colson has said what makes it impossible to believe that GL didn't know from the very first, meaning not later than two days after the arrests. Nobody would have dared order Eunt to flee the country on his own. Colson goes out of his way to pin it on Phrlichman through ean. T, he is out for both at the least. How can he justify not telling GL after he exploded?

He appears to perget that as of the time he gives hunt was still a WH employee. He can't help but know his office was still taking messages for hunt later than that. The reporters told me, separately.

He now says that in early January 1973 he had reason to suspect WH involvement in the cover-up. This is centrary to what he said in his Press club facing of Hollenhoff. He then proceeds to list three thing that he says in retrospect only should have made him suspicious. When he know Hunt worked for WH, he needed no more. But if he felt he did, the first of these should have been enough. He said he told Magruder to Watch the Hunt-Idddy operation closely. Hrs. Hunt's October, hysterical call about hush money also should have sent him circling the eval office.

He appears to be making an effort to address hismelf self-protectively to what he has every reason to believe Dean will spoduce, Colson's nome on his Hunt relationship and Colmson's tape of his conversation with Hunt by phone at the least for he enumerates them.

It now seems that all these WH guys had their phones rigged for taping. All the top ones now seem to acknowledge making tapes.

There have been later indications of many splits inside the top WH echelon. Several point to Ehrlichman as an intended victim, with Dean. They have to have someone on whom to pin responsibility for what "ean can produce and since he was under Ehrlichman and the choice is Haldeman (perhaps Colson also), Ehrlichman has to show his logalty and dedication to GL and all he stands for. Whether or not he wants to. I think this is now clear.

What Colson seems not to have considered is that in all of his new expositions he has to account for his not going to the prosecutors in person with his hindsights. I think his failure to do this would, were he not of the party in power, be enough to get him indicted. There is less excuse for a lawyer not doing this than for a mere nortal. The lawyer is the agent of the court and he knows the law, so Colson has only his duty to GL to use as defense.
