

JDW,

Stanford Research Institute

3/11/74

In your 3/6 you say SRI was separated from university over student and faculty protests. This makes more sense of something I had earlier noted, that before becoming Nixon's official tape expert it had profitable military contracts.

Your reference to their parapsychological operations is to what I had not known. I find myself wondering if this makes them more expert as Nixon sees and needs expertise.

Telekinesis is new to me, reports of telepathy are not. There recently has been some debunking of some whose powers seem to have vaporized upon tough controls. Or under super-tough other-than-controls. I think they were involved in this, perhaps TIME story within past month.

One of these stories I had extreme difficulty accepting, a wired plant registered high on the meter at the exact moment the man who raised and tended them reached climax with his girl friend. But if so, I must say she is quite a girl friend? Some vibes! I think it was 50 miles away. Today show recently had sequence on this, perhaps month ago.

I am not, however, prepared to dismiss all of this and find it particularly interesting that SRI has not only military contracts but those of this nature at the time GL picks them out to serve him. HW
