A Defense of Justice's Probeom Of Watergate

Washington
Attorney General Elliot L.
Richardson told Justice Department employees yesterday that uncooperative witnesses and a temporarily successful coverup hampered federal investigation of the Watergate scandal.
Richardson, responding to claims in Congress and else-

claims in Congress and elsewhere that the inquiry was inadequate, offered a strong defense of the department's efforts to get to the bottom of the break-in and bugging of Democratic headquarters

of Democratic heauquarters last June.

"Based on what I know, the department did conduct a thorough and far reaching investigation, but certain investigation, but certain persons chose not to talk?" said Richardson, who took over as attorney general two weeks ago.
